MagnaSweep®

Make time for the important things!

Maintaining a clean, fresh and healthy pool is easy with the MagnaSweep in-floor cleaning and circulation system. The advanced, self-cleaning technology will improve circulation and take care of the cleaning so you can enjoy precious time with family and friends.

MagnaSweep, the easy way to own a pool!

Circulation is the key to healthy pool water

A pool isn't clean unless it's well-circulated. To have immaculate, healthy pool water, you need an effective cleaning and circulation system. The MagnaSweep self-cleaning system increases sanitisation, ensures an even dispersement of chemicals, eliminates cold pockets, and reduces heat loss. This means less time spent cleaning, and more time for what's really important: enjoying your pool.

Not only does MagnaSweep save you time and money, it's also better for the environment. A well-circulated pool uses less energy and requires fewer chemicals to maintain, making your pool equally kind to the environment and your pocket.

Standard circulation systems only move water at the surface, creating cold spots, layering and poor sanitisation.

MagnaSweep distributes clean, sanitised water evenly throughout your pool for a better pool experience.

How does it work?

The MagnaSweep in-floor cleaning and circulation system is specially designed to suit your new swimming pool. The cleaning heads are built into your pool during construction so they blend seamlessly into the floor of your pool.

The retractable cleaning heads are strategically positioned in the floor of your pool for complete cleaning coverage. They lift and rotate with each cleaning cycle, completing a 360° sweeping action to remove debris and improve circulation.

Cleaning your pool has never been this easy!

What are the benefits?

The easy way to own a pool!

Nothing could be easier than a swimming pool with a MagnaSweep in-floor cleaning and circulation system. MagnaSweep cleans automatically and improves water quality so you have more time to enjoy your pool with family and friends.

- ✓ Relax while your pool cleans itself
- ✓ No robots, no hoses, no work
- ✓ Reduce pool treatment and heating costs
- ✓ Spend more time enjoying your pool
- ✓ Great long-term investment
- ✓ Impressive long-term warranty
- ✓ Improves circulation & water quality
- ✓ Safe and reliable

Stylish colour options

MagnaSweep systems are available in six stylish colours – Black, Blue, Euro Blue, Gold, Grey, and White – to suit the interior finish of your new swimming pool. With an option to complement almost every style and colour choice, the MagnaSweep cleaning heads and drain virtually disappear into the floor of your pool.
